THE HONORABLE DAVID C. TREEN
GOVERNOR OF LOUISIANA
MEMBERS OF THE LOUISIANA LEGISLATURE
MEMBERS OF THE STATE BOARD OF ELEMENTARY
AND SECONDARY EDUCATION

I respectfully submit to you this One Hundred Thirty-third Annual Financial and Statistical Report, in accordance with the provisions of Louisiana Revised Statutes 17:22(6).

For the past few years, the Bureau of Research in the Office of Research and Development has instituted procedures to enhance the timeliness of this document and the relevance of its contents. I believe this aim has been amply accomplished and trust that you will agree when you examine this document.

Sincerely,

J. Kelly Nix

PREFACE

The Bureau of Research, Office of Research and Development of the Louisiana Department of Education, is pleased to present this One Hundred Thirty-third Annual Report.

Educators require accurate data when planning, implementing, and evaluating educational programs. This Annual Report includes information on school finance, student enrollments and characteristics, and staffing, as well as projections and comparative statistics. Data for each of Louisiana's 66 school districts are included and presented in such a manner as to be a ready reference for busy administrators.

The outline for the 1981-82 Annual Report is:

A. State Summary
  - Section I. Trends in Louisiana Public Education
  - Section II. Comparing Louisiana and the Nation
  - Section III. Louisiana and the Southeast Region
  - Section IV. Perspectives and Forecasting
  - Section V. Footnotes

B. Educational Profiles
  - Section I. State Profile
  - Section II. Parish/City Educational Profiles

C. Index

Because we are committed to making this Annual Report as readable and complete as possible, we sincerely invite your comments and criticisms.

No publication of this scope is ever produced by the efforts of a few. We wish to thank all of the persons in the local districts who so generously gave of their time to make this publication reflect accurate and timely information. Too, our sincere gratitude to those members of the Department of Education staff who worked with us in gathering data and coordinating it across Offices and Bureaus.

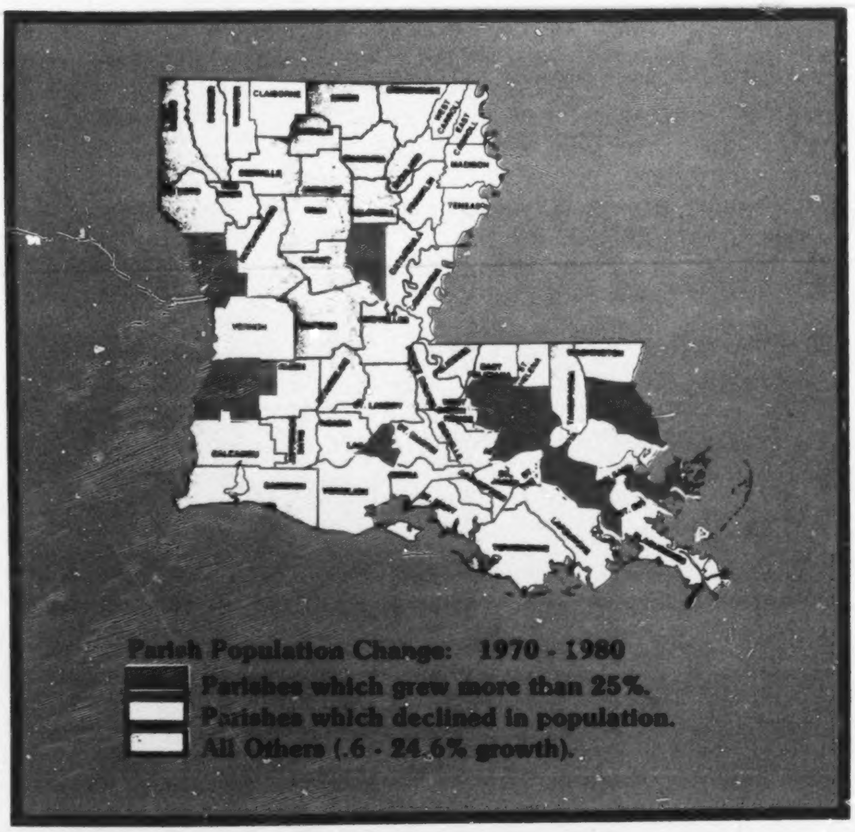
I. TRENDS IN LOUISIANA PUBLIC EDUCATION

A. Trends in Student Enrollment

Louisiana experienced a continuous population growth during the decade of the 70s. Because of various factors such as good weather conditions, favorable labor supply, etc., more people have moved to Louisiana recently than have left the State. Too, Louisiana has traditionally had a higher birth rate than the rest of the nation.

While this population growth is both good for our State economy and for the future of education, it is not without its problems. A recent publication[1] indicated that the state's population increased from 3,644,637 in 1970 to 4,203,972 in 1980, an increase of 15.3%. Figure 1 illustrates the greatest population growth areas in the State during the decade. Table 1 details the population growth of each parish in the State from April 1970 to April 1980. It is interesting to note that 12 parishes grew in population more than 25% over the 1970 population figure. This has major implications for these school districts in terms of future planning.

Figure 1. Parish Population Change



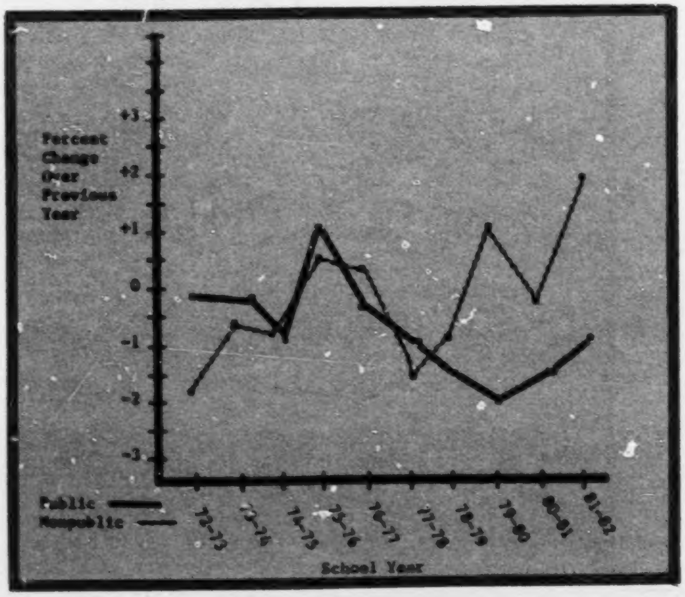
Parish Population Change: 1970 - 1980
Parishes which grew more than 25%.
Parishes which declined in population.
All Others (.6 - 24.6% growth).

Parishes along the banks of the Mississippi River from Pointe Coupee to Jefferson enjoyed large population increases. The growth appears to be attributed to two factors: increased industrialization and spillover from metropolitan into rural parishes. Livingston Parish claimed the largest increase among these parishes with a 60.7 percent gain.

Table 2 provides information on the percent of families in poverty in Louisiana in 1979 as compared to the percent in 1969. The average percent of families in poverty for Louisiana in 1979 was 15.5%, compared to 21.5% in 1969. Louisiana, therefore, experienced a 6.4% decrease in poverty level families. The State average, however, remained above that of the U.S. average (although this difference has decreased from 10.8% in 1969 to 5.5% in 1979). All parishes, except one, experienced some decrease in poverty families during this 10-year period; Orleans parish is shown to have had only a slight increase. Further information is provided in the table.

Student registration trends are presented in Table 3. If kindergarten and special education children were removed from these numbers, a small decline in public enrollment would occur each year from 1972-73 to 1981-82. The nonpublic school population has been stable during this period, with a range of 15.21% to 16.29% of the school age children of our State. Eighty-seven percent of the students in nonpublic schools in 1972-73 were white, while 83% in 1981-82 were white. The public schools had 60% white enrollment in 1972-73 and 57% white enrollment 1981-82. Figure 2, below, illustrates the percent change in student registration over the previous year from 1972-81.

Figure 2. Percent Change in Student Registration Over Previous Year, 1972-1981



School year 1980-81 was the first year that accurate data on the number of Hispanic, Asian and Indian Americans in Louisiana schools were gathered. In the 1981-82 school year there were 13,627 students from these other ethnic groups in the public school system and 1,553 in the nonpublic school system.

Table 4 details trends in average daily membership and average daily attendance. From 1972 to 1982 average daily membership fell 9.4% corresponding to the average daily attendance decrease of 8.5%. These two percentages should fluctuate at about the same rate; however, the .9% disparity is accounted for in the .9% increase in percent attendance of membership for the same period.

Trends in Louisiana school dropouts are presented in Tables 5, 6 and 7.

The percentage of students who drop out of public schools did not change significantly over the decade, with the range being from 1.87% in 1981-82 to 2.27% in 1973-74 (see Table 5). Although there were fewer black students than white enrolled in our public schools during the past decade, they accounted for a significantly higher dropout percentage. However, this disparity decreased over the years (see Table 5) and in fact, in 1980-81 and 1981-82 the percent of black and white dropouts was proportionate to the percent of black and white enrollment.

The table below gives selected statistics on dropouts at 5-year intervals from 1971 to 1981.

Table A. Selected Dropout Statistics

SCHOOL YEAR:	71-72	76-77	81-82
Total Number of Dropouts	18,678	17,564	15,134
% of Total Registration	2.14	2.02	1.87
% of Dropouts Who are White	52.1	56.8	59.9
% of Dropouts Who are Black	47.9	43.2	40.1

Taken from Table 5 of the State Summary Tables: Trends In Louisiana Public School Dropouts, 1971-82.

More detailed information on dropouts from 1981-82 is found in Tables 6 and 7. A larger percent of whites than blacks drop out between the ages of 15 and 17, while a larger percent of blacks than whites drop out below the age of 15 and above the age of 17. A higher percentage of blacks (43.4%) drop out of school before the tenth grade than do whites (36.7%). A considerably higher percentage of the parents of black dropouts (75.4%) do not have a high school education compared to the parents of white dropouts (54.0%).

White dropouts are slightly more active in extracurricular activities than blacks, but neither group is very active. The reasons that schools gave for the students' dropping out is similar for both races, with educational problems and personality and adjustment problems accounting for 64.7% of the dropouts. Educational problems as a major reason for dropping out is reflected in the fact that 66% of the dropouts were given a low scholastic rating by their schools.

Tables 8, 9 and 10 depict suspension and expulsion data for black and white students. Approximately 42% of students in Louisiana public schools are black; however, 57% of suspended students are black, and 60% of expelled students are black. Black students are suspended for an average of 2.27 days per suspension while white students are suspended for 1.8 days. Thus, it appears that blacks are suspended more frequently than whites and for a longer period of time (see Table 8).

Tables 9 and 10 compare the most frequent reasons for suspension or expulsion for black and white students. During the 1981-82 school year, blacks were most often suspended or expelled for fighting with students and/or faculty and for disrespect for authority (41.1%) while only 29.7% of white students were suspended or expelled for these reasons. Cutting classes, excessive tardiness, and disturbing classes are other major reasons for suspension or expulsion of both black and white students.

While total student registration showed a steady decline from school year 1972-73 through school year 1981-82, the absolute number of high school graduates per year increased 1.16% over that period. Nonpublic graduates did not increase significantly from 1972-73 to 1981-82; however, public graduates increased 1.4%. Public school graduates constituted a steady 84%-85% of the total number of graduates over this period. Black students constituted 30.7% of the total graduates in 1972-73 and 32.7% of the total graduates in 1981-82. See Table 11 for more details about the number of high school graduates in Louisiana during this period. Information on the number of students receiving general equivalency diplomas in 1980, 1981, and 1982 will be presented later in the narrative.

Student registration from 1972 to 1982 in regular and special education categories is presented in Table 12 (The Table below gives the percent change in the last 10 years for student registration). As noted in Table 12, there is a decrease in

Table B. Percent Change in Student Registration, 1971 to 1981

student registration each year during this period when the students in special education are removed from the population. The overall decrease of 10% in regular elementary and secondary education was composed of two different trends during the period: elementary enrollment dropped considerably, 12.5%, while secondary enrollment dropped 5.8%. See Table 53 for complete information on registration per grade level in 1981-82.

The drop in elementary enrollment was a function of the decrease in birth rates during the 1960s and early 1970s, while the stability in secondary enrollment reflected the higher birth rates of the late 1950s and early 1960s. It should be noted that enrollment in secondary education peaked in school year 1976-77 and should show the steady decline in the 1980s that elementary schools showed in the 1970s. Conversely, elementary enrollment figures should begin increasing in the 1980s as a function of the increased birth rates of the late 1970s (1981-82 figures do show a slight increase in elementary enrollment). Table 53 presents student enrollment projections through 1985-86.

There was a large increase in kindergarten and special education enrollment during the past decade. Kindergarten enrollment expanded by 64.5% from school year 1972-73 through school year 1981-82. Kindergarten enrollment for 1981-82 was 7.4% of the overall student population.

Enrollment in special education classes, both elementary and secondary, increased dramatically over the past decade. The increase in elementary special enrollment was 29.9% during this period, while secondary special enrollment increased approximately 180%. Students in special education constituted 3% of the total student population in 1981-82, compared to only 1.9% of the total in 1972-73.

B. Trends in Staff and Structure of Schools

There was an overall increase in both the professional and nonprofessional staffs of the public schools from 1973-74 to 1981-82, as indicated in Table 13A. The professional staff increased by 9.22% during this period, while the nonprofessional staff increased by 21.0%. The percentage of professional staff within public schools ranged between 58.6% and 61.6% during this period.

A more detailed breakdown of professional and nonprofessional personnel in the public school system is presented in Table 13B. Slightly over 50% of all the staff in the public school system are full-time classroom teachers. Louisiana has traditionally had one of the highest percentages of nonprofessional staff personnel in the nation (see Table 43), and this trend has continued through 1981-82. Approximately 41% of the public staff in 1981-82 were nonprofessional, with service workers (19.6%) and office/clerical workers (12.4%) comprising the largest categories.

Trends in professional and nonprofessional personnel in the nonpublic school system from 1971-80 can be found in the 131st Annual Report of the Louisiana State Department of Education. Starting with school year 1980-81, a new format for reporting nonpublic school personnel was initiated. Data for the 1981-82 school year are reported in Table 14.

From school year 1973-74 to school year 1981-82 there were changes in the sex and race ratios of principals and classroom teachers in the public school system, as indicated in Table 15. The 7.5% decline in percentage of white male principals over this period was accounted for by a 2.1% increase in black principals and a 4.5% increase in white female principals.
In 1973-74, 74.5% of the classroom teachers were female. This figure had increased to 79.8% by school year 1981-82. Thus, the inverse relationship between percentage of male principals and percentage of male classroom teachers continued unabated during this period. The black-white ratio of classroom teachers stayed approximately the same during the past decade.

The student-teacher ratios for public and nonpublic schools for 1981-82 are presented in Table 16. Trends in student-teacher ratios for the period 1971-80 can be found in the 131st Annual Report of the Louisiana State Department of Education. In 1981-82, there were 19.2 students for every full-time classroom teacher in Louisiana public schools. Tables 40-42 present mean class size by class type data, which are a more meaningful measure of the relationship between the numbers of teachers and students in the Louisiana school system. The table below gives 1981-82 ratios by school level.

Table C. Student-Teacher Ratio

C. Special Education	18.44
D. Total	25.48

Derived From TABLE 16, State Summary Tables: Student-Teacher Ratios for Public and Non-Public Schools, 1981-82.

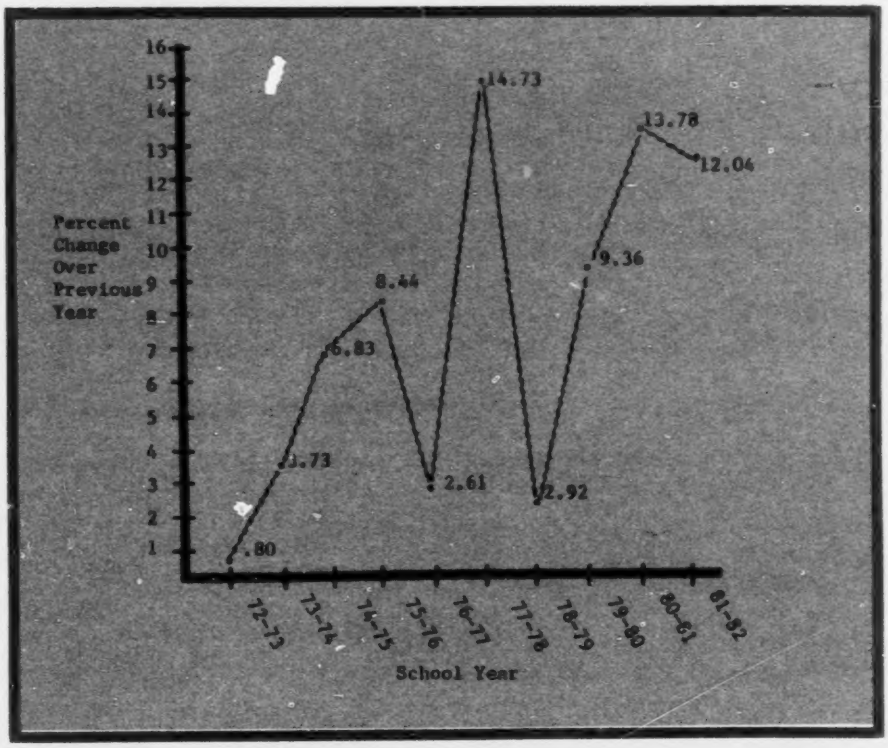
The professional training of the public school instructional staff changed considerably during the period from 1973-82 as indicated in Table 17. The number of teachers and principals with less than a college education decreased from 1.77% of the total to only .49% while the number with a bachelor's degree decreased from 65% to 56%. Conversely, the number with more than four years of college increased dramatically from 32.9% of the total in 1973-74 to 43.5% in 1981-82.

Table 18 presents the total experience of teachers and principals in the public school system from 1972 to 1982. The number of teachers with fewer than five years of experience decreased from 29.4% of the total in 1972-73 to 21.5% in 1981-82. On the other hand, the number of teachers with five to nine years of experience increased from 22.3% of the total to 26.6%, and the number of teachers with 10 to 14 years of experience increased from 16.3% to 20.6%. Thus, teachers with five to 14 years of experience increased from 38.6% in 1972-73 to 47.2% in 1981-82. It would appear that attrition is likely to occur within the first five years of teaching. If teachers remain in the profession after this time, they are apt to stay until 20 years of service have been completed.

The annual salaries of principals and teachers in the public school system increased each year from 1972-82. This trend is presented in Table 19. The average teacher salary increased

103% during this period (from $8,837 in 1972-73 to $17,930 in 1981-82), compared to an 111% increase for principals (from $13,832 in 1972-73 to $29,156 in 1981-82). Salaries for black teachers were slightly higher over this period than those for white teachers. This is probably a function of the longer average experience of black teachers in the public school system. Figure 3, below, illustrates the percent change over the previous year in the average teacher salary, 1972-82.

Figure 3. Percent Change Over Previous Year for Average Annual Teacher Salary, 1972-1982.



The total number of public and nonpublic schools increased by 5.0% from 1972 to 1982. Thus, while the total number of students decreased, the number of schools increased. There was a net increase of 95 schools during this same 10-year period, consisting of an increase of 67 schools in the public school system and a increase of 28 schools in the nonpublic system. However, in comparing the 1981-82 school year with the previous year, the number of public schools decreased by nine while the number of nonpublic schools increased by 53. See Table 20 for more details.

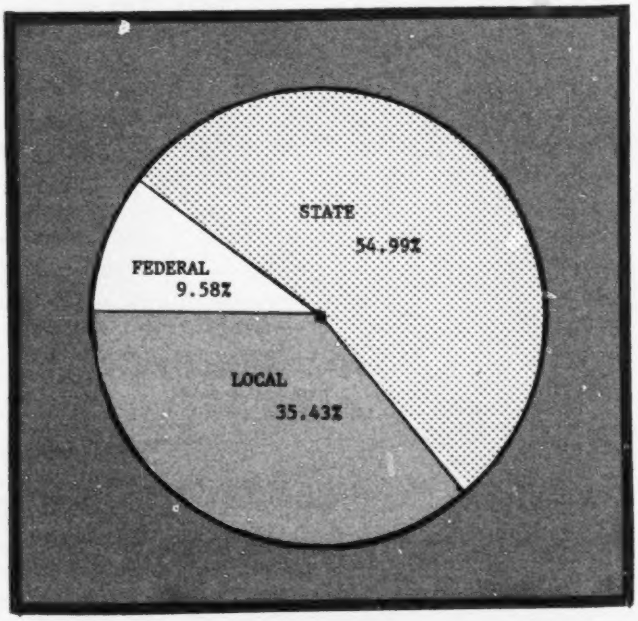
As indicated in Table 21, there was a net decrease in the number of buildings and in the number of sites of public school property from 1972-82. Overall, the total cost of buildings, sites and equipment more than doubled during this period, with the largest increases occurring during the inflationary 1976-82 period.

The number of libraries, librarians, and books all increased from 1972-82, as noted in Table 22. Current payments for salaries, books and supplies more than doubled during this period.

C. Trends in Education Finance

The trend in revenue from local, State and Federal sources for education for the 1977-82 period is presented in Table 23. Only the last five years of the decade were included in this trend analysis. Figure 4, below, illustrates the percentages of revenue from local, State and Federal sources for 1981-82.

Figure 4. Sources of Revenue for Education



Total revenue increased by 64.18% over this five-year period from $1,259,595,149 in 1977-78 to $2,068,009,995 in 1981-82. The percent of total revenue from local sources increased 5.33% over this period, while the percent of the total from Federal sources decreased 5.11% and that from State sources decreased only slightly. As indicated in Table 24, the revenue from ESEA Title I funds increased by approximately 130% from 1972-73 through 1981-82. In 1981-82, ESEA Title I funds accounted for 3.83% of the total revenue for education.

The minimum foundation program for Louisiana for the past 10 years is presented in Table 25. The overall cost of the program more than doubled (2.18 times higher in 1981-82 than in 1972-73) over this 10-year period. However, the local support for the program increased only 4% during this same period. Thus, the percent of local support for the total cost of the program decreased from 9.70% in 1972-73 to 4.62% in 1981-82.

The expenditure of all State revenues (including Federal grants) and of State revenues (excluding Federal grants) for all government functions is found in Tables 26 and 27. These figures were taken from the Executive Budgets of the State of Louisiana for the past 10 years. The percent of all State and Federal revenues going to education ranged from a low of 31.83% in 1980-81 to a high of 36.95% in 1972-73. The percent of State revenues going into education ranged from a low of 35.21% in 1975-76 to a high of 42.13% in 1972-73. In 1981-82, 34.03% of all State and Federal revenues and 39.61% of State revenues were spent on education.

Education expenditures by function for the period 1977-82 are found in Table 28. During this period total expenditures increased by 62.2%. The percent of the total amount spent for instruction and for supporting services stayed about the same during this period: approximately 43% to 47% for instruction and 50% to 54% for supporting services. The largest relative increase for instruction occurred in special programs.

Expenditures per public school pupil for the past decade are found in Table 29. The expenditure per registered student increased from $813.55 in 1972-73 to $2,297.61 in 1981-82. Similar increases in expenditure per pupil in average daily membership and expenditure per pupil in average daily attendance occurred during this period. The expenditure per pupil in average daily membership was $2,435.78 in 1981-82, while it was $2,626.30 per pupil in average daily attendance.

Indebtedness for the state's parish/city school systems totalled $805,355,951 in 1981-82; 98.7% of this debt was bonded debt. See Table 30A for a breakdown of school system indebtedness for 1981-82. Also, see Table 30B for the total ending balances for cash, petty cash and investments for parish/city school systems in 1981-82.

See Table 54 for more details concerning revenues and expenditures for the State Department of Education for the fiscal year ending June 30, 1982.

II. COMPARING LOUISIANA AND THE NATION

A. Population Characteristics

By comparing Louisiana and national educational statistics, the relative strengths and weaknesses of the state's educational system can be determined. Louisiana has a unique set of population characteristics, as can be seen in Tables 31, 32, and 33. Louisiana's birth rate has traditionally been among the highest in the nation. From 1960-74 the national birth rate dropped dramatically, and Louisiana's birth rate fell from the fifth highest to the ninth highest in the nation. Since 1975, however, the national rate has increased, and Louisiana's rate has also increased (see Table 31). Provisional estimates[2] of the birth rates for 1981 show a continued high rate--19.1 births per 1000 population--for Louisiana.

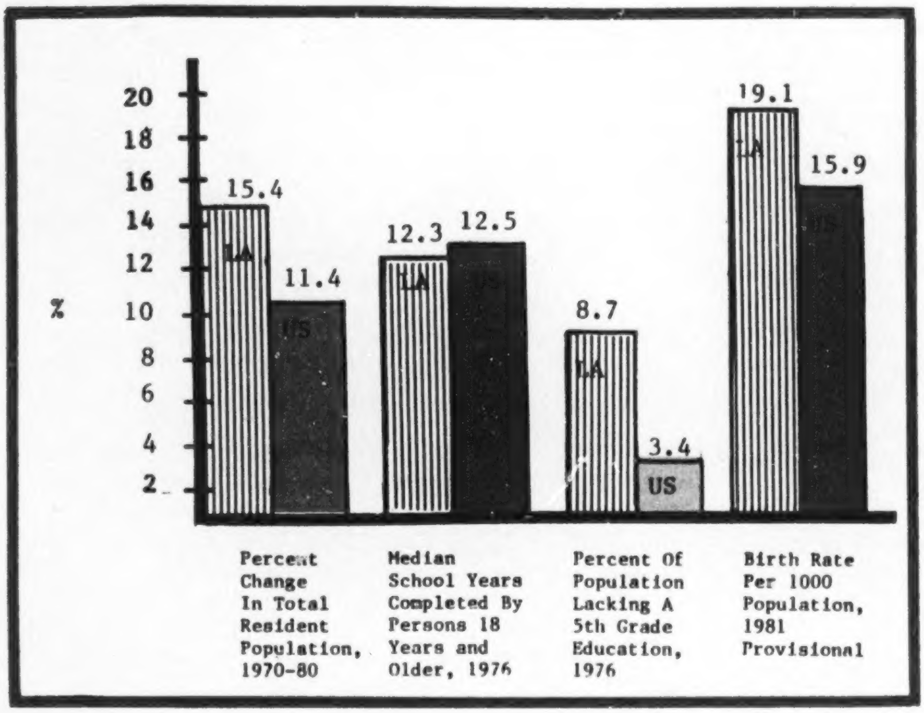
Louisiana ranks fourth in the nation in percent of the population who are school age (Table 32), while ranking forty-third in percent of the population aged 21 and over.[3] As a result of this demographic dispersion, Louisiana has 43.9 school-aged children per 100 adults aged 21 and over, the third highest ratio in the nation in 1980 (Table 33). This large number of school-aged children per adult places a heavy educational support burden on the adult population.

Traditionally, Louisiana has had a high rate of illiteracy. Based on Bureau of the Census estimates, Louisiana had a higher illiteracy rate than any other State in 1950, 1960, and 1970. In 1976, 8.7% of the Louisiana adult population were functionally illiterate or lacking a fifth grade education. However, also in 1976, Louisiana ranked slightly better in median school years completed by persons 18 years and over, percent of persons 18 years and over who have had 4 years of high school or less, and percent of the population who are college graduates; the State still ranks in the lower quarter of the nation in these categories (see Table 33). The 1980 census final statistics will provide more up-to-date data on the current educational attainment of adults in Louisiana. Figure 5, illustrates selected statistics from Table 33.

B. Pupil Characteristics

Nationally, the absolute number of pupils in school peaked in 1970 and declined after that because of the lowered birthrate in the 1960s and early 1970s. Louisiana has followed this national trend: there has been a decrease in the absolute number of pupils in elementary and secondary schools (excluding kindergarten and special education) each year from 1970-71 through 1981-82.

Figure 5. Selected Statistics on United States and Louisiana Comparisons



A comparison of declines in public school enrollment in Louisiana and the nation between fall 1971 and fall 1976 compiled by the Public Affairs Research Council[4] yielded the following results: (1) the Louisiana change in elementary school enrollment (grades 1-8) was -11.6% compared to the national decline of -11.2%; (2) the Louisiana percent change in high school enrollment (grades 9-12) was +7.9% compared to the national increase of +4.1%; and (3) the total change in fall public enrollments (grades 1-12 excluding kindergarten and special education) for Louisiana was -6.1% compared to the national average of -6.4%. Louisiana's slight relative loss in elementary enrollment was offset by a relative gain in high school enrollment.

The National Center for Education Statistics[5] presented similar results when comparing public school average daily attendance for the school years ending 1970 and 1977: Louisiana had an overall percent change of +0.8% during this period, while the national percent change was -2.6%. Thus, Louisiana's losses in public school enrollment and attendance during this period of national decline were equal to or slightly less than the national average. Projected future trends in Louisiana's elementary and high school education systems will be discussed later in the narrative. (Different procedures were used by NCES and the Louisiana State

Department of Education to calculate the average daily attendance figures presented here and in Table 4.)

Louisiana's recent enrollment figures are compared with national figures in Table 34. The state's public school enrollment was the eighteenth largest in the nation in 1981, and the State ranked fifth in percentage of students in nonpublic schools, behind only Pennsylvania, Hawaii, Delaware, and the District of Columbia. The State ranks low, however, in average daily attendance as a percent of either enrollment (39th) or average daily membership (39th). The State had three of the nation's 60 largest public school systems according to a recent report:[6] (a) Orleans parish ranked 25 (b) East Baton Rouge Parish ranked 40; and (c) Jefferson Parish ranked 44.

Table 35 presents a comparison of Louisiana and national pupil retention rates from the fifth grade through high school graduation. Over the last five selected years, Louisiana retained only 63.8% of its students in public and nonpublic schools as compared to a national retention rate of 74.4%. This low retention rate explains why Louisiana ranked below the national average in percent increase in number of public high school graduates from 1976-82 even though the State was ranked high in percent of the population who were school-aged during that period.

Data supplied by the American College Testing (ACT) program indicate that there was a decline in ACT scores both nationwide and in Louisiana from 1971 to 1982 (see Table 36). This decline occurred primarily from 1971-76 and the scores have remained relatively constant since that time nationally and in Louisiana.

A 1980 report by the Louisiana State Board of Regents[7] compared the ACT scores and high school gradepoint averages of first-time college freshmen in Louisiana with national scores. Although declining ACT scores have been accompanied nationwide by increased high school gradepoint averages, the Board of Regents found grade inflation in Louisiana to be below the national average for the period reviewed. High school averages in Louisiana for first-time freshmen went up 10% between 1969 and 1978, compared to a national increase of 16%. The mean high school average of Louisiana first-time freshmen who took the ACT in 1978 was 2.81 (on a four-point scale), compared to the national average of 2.99.

Not only do the ACT data reveal information concerning student performance in verbal and computational skills but they also present information on student satisfaction with various aspects of high school education. Table 37 compares Louisiana student satisfaction to national student satisfaction with regard to specific aspects of high school programs. Among the areas receiving the highest ratings by Louisiana students were classroom instruction, guidance services, library or learning centers, and grading practices and policies. The highest percentages of dissatisfaction were found in the number and variety of courses, school rules, regulations, and policies, laboratory facilities, and emphasis on career education and planning. Louisiana students were more satisfied than the national sample in nine of the 11 areas.[8]

Comparative figures on the SAT (Scholastic Aptitude Test) present a different trend. As indicated in Table 38, Louisiana students scored well above the national average on the SAT from school year 1973-74 to school year 1981-82. The mean composite score for Louisiana students in 1981-82 was 975 compared to the national score of 893.

The contradiction in ACT and SAT national comparisons may be explained by differences in the student populations taking the two tests in Louisiana. Louisiana has one of the most liberal policies for admission to college in the nation, and the State requires that all freshmen take the ACT. Consequently, more students with marginal chances of success in college take the test in Louisiana than do nationwide. On the other hand, only those students going to out-of-state universities and in-state private universities take the SAT, while all freshmen take the test in certain areas of the country.

C. Staff Characteristics

In 1978 the Public Affairs Research Council published a bulletin entitled Impact of Declining School Enrollments: Past, Present and Future. In this bulletin it was demonstrated that a decrease in students and an increase in teachers occurred in grades 1-12 (excluding kindergarten and special education) of the Louisiana public school system between school year 1969-70 and school year 1977-78. A similar analysis by the Bureau of Research[9] on data from 1970-71 to 1979-80 demonstrated a 9.7% decrease in students and a 2.7% increase in teachers during this period. These trends resulted in a decrease in the pupil-teacher ratio during the 1970s.

This trend in Louisiana followed a national tendency toward decreased pupil-teacher ratios in the 1970s that has continued into school year 1981-82. The National Education Association provides data that compare the trend for both the U.S. and Louisiana. These data can be found in Table 39. Louisiana ranked thirteenth in the nation in 1972 in teacher-pupil ratio and thirtieth in the nation in 1981. However, the actual pupil-teacher ratio in Louisiana decreased from 20.2 to 18.2 during that period. (Some differences exist in the figures produced by the NEA and PAR analyses because of different techniques for computation of the ratios.)

The Bureau of Research collected data on classroom size by classroom type for the first time in Louisiana during the

1980-81 school year. These data contain more valuable information than pupil-teacher ratios, which mask large differences in classroom sizes that exist between regular, special, and compensatory classes.

The distributions of classroom size by classroom type for elementary and secondary schools for school year 1981-82 are found in Tables 40 and 41 respectively. Table 42 presents mean class size by class type. As tables 40 and 41 indicate, the highest percentage of regular classes is found in the medium class size range (20-24, 25-29). This applies to both elementary and secondary schools. Ungraded (continuous progress) classes in the elementary schools are also concentrated in this range.

Special education classes, on the other hand, are concentrated in the smaller class size range (5-9, 10-14). This also applies to both elementary and secondary schools. Compensatory education classes in elementary schools are also concentrated in the smaller class range. Vocational education classes are concentrated in two medium class size ranges (15-19, 20-24).

As Table 42 indicates, the mean class size for regular education classes in the elementary grades is 24.96, while it is 22.24 in the regular secondary grades. Mean class size for special education classes for the elementary and secondary grade levels are 8.55 and 8.39 respectively.

NCES estimated[10] that 40.8% of the staff employed by the public school system in Louisiana were nonprofessional, compared to the national percent of 33.8% in the fall 1978. On the other hand, only 53.6% of the staff in Louisiana were professionals involved in education (instructors, etc.), compared to 60.0% nationally. Louisiana ranks second among the states in percent of nonprofessionals employed and forty-eighth in percent of professional instructors (see Table 43).

While the State has maintained a pupil-teacher ratio comparable to the national ratio, the estimated average salary of public school teachers has been consistently below the national average. However, in the 1981-82 school year, the difference narrowed considerably. According to National Education Association estimates,[11] Louisiana paid its public school teachers 81.4% of the national average in 1969-70, 82.1% of that average in 1974-75 and 97.04% of the national average in 1981-82. The estimated average salary of public school teachers nationally was $19,064 in 1981-82, compared to the Louisiana average of $18,500. According to NEA then, Louisiana ranked twenty-third nationally in estimated average teacher salaries in 1981-82.

It should be noted that data collected at the Louisiana State Department of Education indicate that classroom teachers in the State made $16,002 in 1980-81, or 92.7% of the national average. This figure is more accurate than the NEA estimate of Louisiana teachers' salaries, since it is based on direct financial reports from the parishes.

The State ranks low in percent of male teachers in public elementary and secondary schools. In 1981-82, NEA estimated that 23.7% of the teachers in Louisiana were male, compared to the national average of 32.1%.

Louisiana has a relatively small number of basic administrative units operating public school districts: 66, one in each parish plus the cities of Monroe and Bogalusa. This is the eleventh smallest number of operating units in the nation.

D. Financial Characteristics

1. Financial Resources for Education

In terms of personal income, Louisiana ranks low in income statistics and high in poverty indicators. As indicated in Table 44, Louisianians earned only 88.84% of the national per capita income in 1980. Also in 1980 Louisiana ranked thirty-eighth in personal income per child of school aged, averaging $8,832 less per child than the national norm. This low average is a result of the high number of school aged children relative to the adult population and the low per capita income in the State. The 1980 ranking, however, is an increase from 1979, when Louisiana ranked forty-sixth in personal income per child of school age.

While Louisiana's per capita personal income is well below the national average, the State is only slightly below the average in per capita total general revenue of State and local governments. Given Louisiana's low per capita income, State taxes are relatively high. As indicated in Table 44, the State ranked thirteenth in 1980 in revenue of State and local governments as percent of personal income. It is interesting to note that these relatively high State taxes are not a function of property taxes, since Louisiana has the second lowest per capita property tax revenue in the nation.

The National Education Association estimated that Louisiana ranked thirty-ninth in the nation in public school revenue receipts per pupil in average daily attendance in 1981-82. Compared to national figures, Louisiana receives relatively less of its revenue for public education from local sources and relatively more from State and Federal sources. The NEA estimated that Louisiana ranked fifteenth in the nation in percent of public education revenue from Federal sources in 1981-82, whereas the NEA estimated that the State ranked third in this category in 1980-81 (see Table 45).

In a supplement to its basic volume, Tax Wealth in Fifty States, 1977, the National Institute of Education[12] presented tax capacity, effort, and collected revenue data for State and local governments. This supplement concluded that Louisiana under-utilized property taxes and slightly over-utilized sales and gross receipt taxes. While the State ranks relatively high in revenue of State and local governments as percent of personal income according to the NEA rankings, the NIE report concludes that the State is taxing well below its capacity relative to other states. In fact, Louisiana has one of the largest negative values in the nation for amount collected less potential tax yield. The major taxes being under- utilized are property taxes on commercial and industrial firms, public utilities, and residences.

2. Expenditures for Education

Table 46 presents a comparison of Louisiana and national direct expenditures for all government functions and for education from 1972-80. For each of these nine years, the percent of per capita income that Louisiana spent on all government functions was above the national average, ranging from an excess of 1.1% to 3.2%.

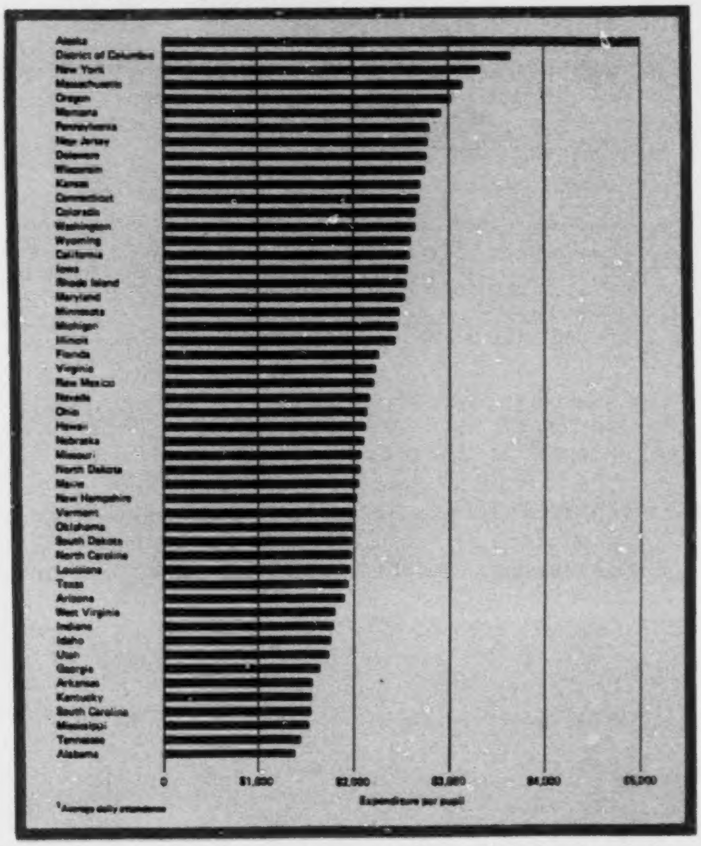
In 1980, Louisiana's per capita personal income was 88.8% of the national per capita income. In school year 1979-80 the amount Louisiana spent per capita on education was 90.7% of the national amount spent. Thus, Louisiana's low ranking, thirty-eighth in amount spent per capita on education is a function of its low per capita income rather than a lower percentage commitment of personal income to education.

Comparisons of State and national expenditures per pupil in average daily attendance and membership are found in Table 47. Louisiana spent approximately 84.8% to 91.3% of the national average expenditure for public schools per pupil in average daily attendance or membership for fiscal years 1980-81 and 1981-82. Although this expenditure is below the national average, the State did spend a higher percentage (4.52%) of its citizens' personal income on education in 1980 compared to the national average (4.30%). Thus, again, the state's low rank on school expenditure is a function of low personal income rather than low commitment to education.

The National Center for Education Statistics[13] publishes an interesting comparison of the school systems of 20 large cities in the U.S. annually. In fiscal year 1977-78, the New Orleans public school system spent $1,647 per pupil in average daily attendance, compared to the national average for large cities of $2,195. Out of the 19 cities ranked on this dimension, New Orleans placed fourteenth. The city spent more money per pupil in average daily attendance than did Houston, Indianapolis, Memphis, Phoenix and San Antonio.

Another publication by NCES presents the distribution of school districts by current expenditure per pupil. No school district in Louisiana spent more than $1,800 per pupil in the school year ending 1979; nationally, 26.4% of the school districts spent more than $1,900 per pupil in this school year (see Table 48). A more recent publication by NCES ranked the 50 states in current expenditure[14] per pupil based on average daily attendance (see Figure 6).

Figure 6. Ranking of Estimated Current Expenditures Per Pupil (ADA), by State: 1980-81



A comparison of the purposes for which Louisiana and the nation expended education funds in 1979-80 is found in Table 49. Louisiana spent less than the national percent for administration, plant operation and maintenance, fixed charges, attendance and health service in this year. It spent more than the national percent for instruction, transportation services, other pupil services, including food services, and capital outlay.

III. Louisiana and the Southeast Region[15]

Louisiana is one of 12 member states of the Southeastern Regional Council for Educational Improvement (SRCEI). Other members are Alabama, Arkansas, Florida, Georgia, Kentucky, Massachusetts, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia. Where the U.S. Census term "South" is used, the Southeastern states are included, in addition to Delaware, the District of Columbia, Maryland, Oklahoma, and Texas. But unless indicated otherwise, this section concentrates on the Southeast and Louisiana specifically.

One of the functions of the Council has been to assist member State Departments of Education in studies of education-related policy issues, including teacher and school effectiveness, educational technology, and school building leadership. A second function was the development of the Southeastern Educational Information System (SEIS), which provides basic educational and demographic data by State, region, and nation.

The data in this section are indicators that the Southeast faces educational and socioeconomic difficulties greater than other regions. Yet at the same time, the southeast has made advances toward achieving "universal education"--a basic education for every citizen. Difficulties affecting the Southeast include such factors as declining enrollments, lower levels of educational attainment, lower per-capita income, lower education revenues, lower per-pupil expenditures and teachers' salaries, greater in-migration, a higher rate of population increase, higher rates of poverty, and higher age-dependency ratios. All of these factors and their impact on education in Louisiana and the Southeast Region will be discussed in this section.

A. Enrollment:

Between 1970 and 1980, the nation experienced a decline in public school enrollment, while experiencing a total population increase. Therefore, the enrollment/population ratio for the nation had dropped from 22.58% in 1970 to 18.05% in 1980. The South had the largest proportion of enrollment as a percentage of 1980 census population figures (18.72%). Louisiana had an enrollment/population ratio of 18.57%. These figures were influenced by many factors such as in- and out-of-state migration patterns, the economy, postponement of childbirth, and changes in public school participation rates.

The North Central Region of the United States experienced the largest enrollment decline during the past decade (17.25%) while the South showed the smallest rate of public school enrollment decline (3.91%). Although the SRCEI states showed the same pattern of declining public school enrollment as the entire nation (except Florida, which had increases), the South held the largest share of the nation's 1980 public school enrollment (34.5%).

In 1980-81 school year, the SRCEI region showed a larger proportion of public elementary enrollments (69.5%) than the national average (67.43%) or the proportions in each of the four U.S. Census Regions (South 69.38%, Northeast 65.10%, North Central 66.24%, and the West 67.97%). The Southeast's larger proportion of elementary enrollment could be attributed to its higher birth rates, younger population (except in Florida), and its growing in-migrating population.

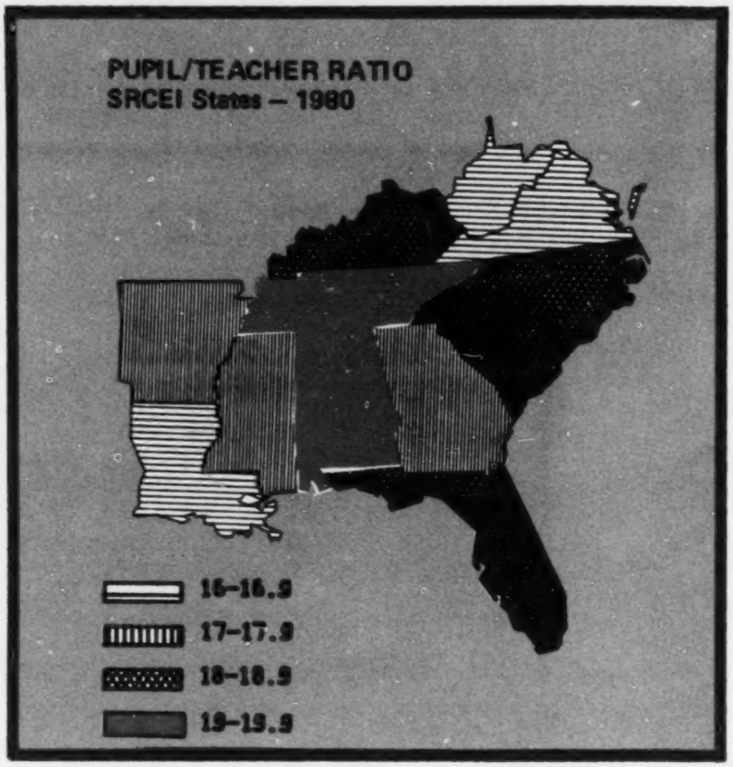
Louisiana's percentage of public school enrollment for 1980-81 was 69.91% which also was above the national, regional, and SRCEI figures. Historically, the South has relied on the public school systems more than other regions. Regional reliance on public education can be seen by comparing average private school enrollments in the Southeast (8.3%) with the national average (10.6%). In the Southeast, only Louisiana (17.2%) and Florida (11.4%) had private school enrollments above the national average. This can be attributed to the schools operated by the Catholic Church, with 72% and 36% private school enrollments respectively.

A comparison of the relative sizes of enrollments in early (1-4) and middle (5-8) grades provides information on the "pressures" on the public school system. Large enrollments in the early grades may indicate a need for expanded facilities and staffs. Fewer students may indicate a need for future cutbacks. For all regions but the West, each age group is smaller as the ages decrease. Louisiana is the only State within the SRCEI region to exhibit the deviating pattern of the West, as both Louisiana and the West show populations that increase in size as the age cohort gets younger.

According to information obtained from SEIS, public school enrollments in the Southeast states are more fully integrated than school systems elsewhere. Desegregation efforts of the last 25 years seem to have been successful in the Southeast, where students are more likely than those in other regions to attend schools with students of different races.

Pupil-teacher ratios, which are not the equivalent of class size, are found by dividing average daily attendance by the number of classroom teachers. The West had the largest number of pupils per teacher (18.54%), with the South following (17.42%). Among the Southeast Region States, Louisiana had the lowest 1980-81 pupil-teacher ratio (16.16%) and Alabama had the highest (19.72%). A decrease in the ratio of students to teachers is associated with an increase in intensive attention and instruction for each child. Figure 7 shows the pupil/teacher ratio for the SRCEI States in 1980.

Figure 7. Comparisons of Pupil/Teacher Ratios for States in the Southeast, 1980



B. Education and the Public:

During the past decade, the South and the SRCEI region made great progress in the number of students graduated from high school. In 1970, only 42% of the SRCEI population 25 years and over were high school graduates, compared to 52.3% of the national population. That was 80.3% of the national average. In 1980, the Southeast, while still showing the lowest percentage of high school graduates, pointed to 58.6% of the population as high school graduates. The Southeast now claimed 88.39% of the national average. This jump is probably the result of some in-migration and increased efforts to educate all citizens.

In Louisiana, 42.2% of the population 25 and over graduated from high school in 1970 and 58.0% in 1980. Figure 8 shows the growing proportion of high school graduates during the decade from 1970-80. Between 1950 and 1980, the median age of schooling completed by Southeasterners had risen from 8.4 years to 12.3 (SRCEI States). This means that half of the Southeastern adult population in 1980 had completed some education beyond high school. During the same period, the median years completed for the United States rose from 9.6 to 12.5, and in Louisiana it increased from 7.6 to 12.3 years. The increase in the number of high school graduates and those with education beyond high school are indications of the progress in Louisiana and the Southeast.

An analysis of 1980 data on educational personnel (Graph 3) shows the South had a greater proportion of education-related employees who made up 4.3% of the total labor force. This proportion is greater than the nation (4.0%) and the three remaining Census regions (3.8%). Louisiana appears to be characteristic of the SRCEI region (61.32%) with professionals constituting 60% of its educational personnel. (Refer to the following table.)

Additionally, with the accountability movement's efforts to improve the educational process, programs have been implemented to improve teacher and staff effectiveness, to increase in-service training, and to upgrade and strengthen certification requirements.

Virginia	106	63.21	36.79	4.2
West Virginia	40	62.50	37.50	5.2

The total number of educational personnel employed in the SRCEI region's public elementary and secondary schools was 972,000 in 1980-81. That figure was nearly a fourth (23.3%) of the U.S. total of 4.2 million. Sixty-one percent of the educational personnel in the Southeast were professional staff (including teachers, administrators, counselors), and 38.68% were non-professional employees (including food service personnel, custodial staff, transportation workers).

Within the SRCEI region, Alabama had the highest percentage of professional staff, while Mississippi had the highest percentage of non-professional employees.

To place these employment totals in perspective, the educational personnel are shown – in the map opposite – as a percent of the total civilian labor force. The South, including the 12 SRCEI states, has an education-related employment level of 4.3% of the total labor force. This proportion is greater than the rest of the nation (the remaining regions have identical 3.8%). In fact every SRCEI state has a percentage higher than that of the non-South area.

Within the SRCEI region, West Virginia and Mississippi have levels of education-related employment above 5% of the labor force, while Alabama has the lowest percentage – 3.9%.

Additional insights may be gained by reviewing these data in conjunction with those on employment, per capita income, teachers' salaries, and staff patterns by race, as well as pupil/teacher ratios.

C. Finance:

As illustrated in the following table, the South in 1980, relied on State revenues for 50.9% of its educational resources. This amount is second only to the Western region (61.0%). The South also claims the largest percentage of Federal revenues (11.8%) of any region. The SRCEI region relies on 12.7% of its educational revenue from the Federal government. Because of its reliance on Federal revenue the South will probably be more sensitive to Federal budget variations that affect education than other regions.

A comparison of all the census regions shows the South (38.93%) allocates the largest proportion of total State expenditures for public education. This could be attributed either to the South's historically greater dependence on public education or its traditionally lower public service funding levels.

*Any funds collected by any intermediate governmental administrative unit or political subdivision between school districts (LEAs) and the state which are used for public education.

Of the $18.1 billion in revenues collected to support education in the SRCEI region during 1980-81, 12.7% came from federal sources, 54.8% originated at the state level, and 32.1% was generated locally. The state and federal percentages for the SRCEI states are substantially higher than the corresponding national figures (and, conversely, the local figure is lower). Of the Census regions, only the West (61.0%) has a higher proportion of revenues generated at the state level.

The proportion of federal dollars supporting education in the SRCEI region is 2.3 times that for the Northeast, 1.7 times that for the North Central, and 1.5 times that for the West. These data underscore the sensitivity of education revenues in the region to variations in federal budget policies. Within the region, Mississippi and South Carolina utilize federal resources for over 16 percent of their education funds. Virginia utilizes the lowest percentage of federal resources within the region. However, at 9.8%, it is still above the national average.

The charts on the opposite page display the SRCEI states' relative dependency on the three main funding sources. While most rely primarily on state funds, Virginia depends on local revenue sources for 50.4% of its education dollars, and Tennessee relies on roughly equal amounts of state and local funding.

The South has the lowest per-pupil expenditure level of all four regions. It spends 80.13% of the national average. Figure 9 depicts 1980-81 per-pupil expenditures relative to the national average of $2,381.00. Louisiana spent $1,972 per pupil during 1980-81, which exceeded the expenditures of $1,908 for the South and $1,817 for the SRCEI Region. The low level of per-pupil expenditures in the South and SRCEI region is perhaps a result of lower per-capita incomes. The Southeast has the greatest proportion of persons living below the poverty level. Education provides an opportunity to increase earning potential.

As a region, the SRCEI States have the lowest levels of expenditure for education relative to personal income, although five of the states have a percentage higher than the national average (3.95%). These states are Virginia, Arkansas, Mississippi, North Carolina, and West Virginia. Expressing income results is a rough measure of a state's relative commitment to education.

Traditionally, the South has not experienced the wealth of other regions. But the gap has closed. In 1960, per capita personal income for the Southeast was $1,258 or 73% of the national per capita income figure of $1,850. In 1981, per capita income in the Southeast rose to $9,014 compared to a national total of $10,491. The Southeast per capita income figure increased to 85% of the national average of per capita income.

Figures from the 1980-81 school session (below) indicate average teachers' salaries in the South ($15,399) were below the national ($17,360) and regional averages. The SRCEI States had even lower average teachers' salaries ($14,926). The average teachers' salary in the South experienced the smallest increase of the regions during the past decade.

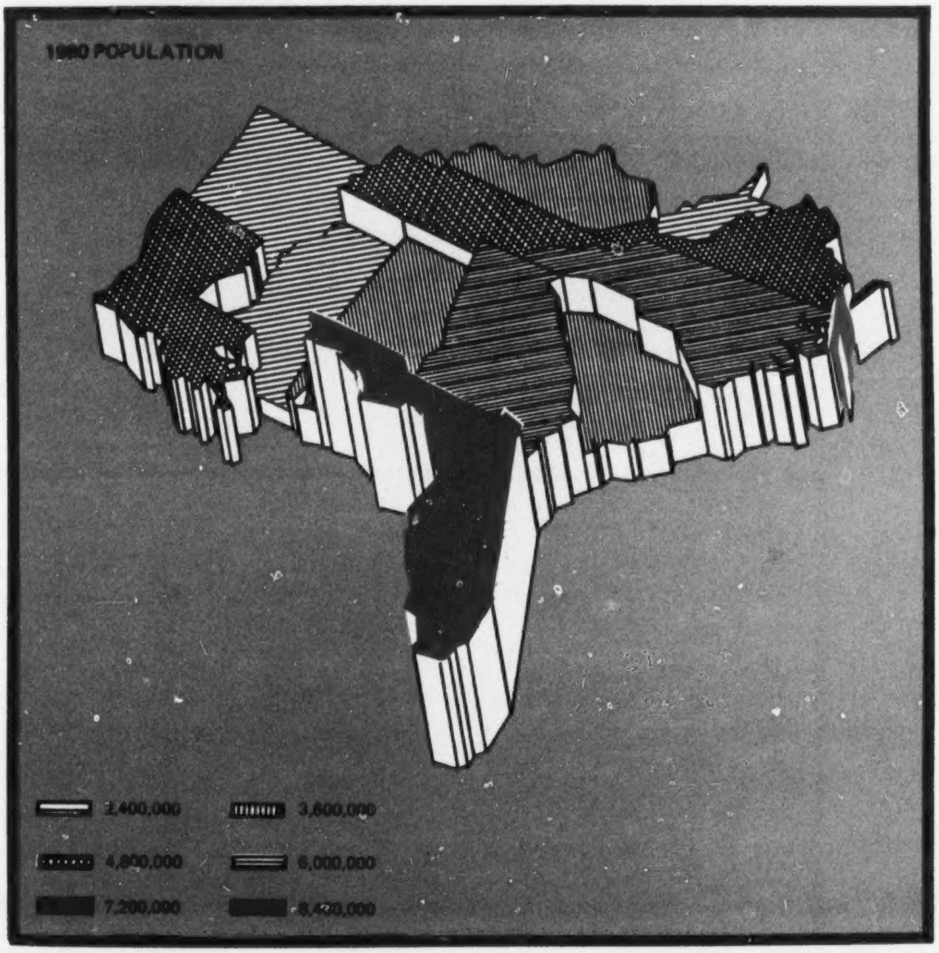
D. Socio-economic Data:

The Southeast has increased its population at a rate twice that of the national rate of growth during the past decade. The Southeast, in 1980, had 23.24% of the national population. The SRCEI States had the fastest rate of population growth during the 1970-80 period, with most of the increase attributed to net migration. This suggests a different population composition from one that would be caused by an increase in birth rates.

Figure 10 indicates the population ranges for the Southeast Region. The growth of the entire Southern population represented 54.03% of the change in national population figures. The Southeastern population increased by 8.9 million, representing 38% of the national population. The rate of increase for the Southeast (20.12%) was twice the national rate of 11.4%.

Figure 10. Comparison of Population for States in the Southeast, 1980



Louisiana experienced a 15.35% rate of increase during the past decade, which accounted for a growth in the State's population of approximately 559,000. Louisiana, during the 1979-80 period, experienced a natural or birth rate increase that accounted for 66% of the change in population figures. Thirty-four percent of the change was due to net migration.

This figure is much lower than the percentage of change because of net migration for the nation (40%) or the regional SRCEI figure (63%).

U.S. Census data for 1980 indicate the racial composition of the U.S. population as 83.15% white, 11.6% black, and 5.6% consisting of Asian, American Indians, and "others." The SRCEI population is 78.5% white, 20.2% black, and 1.4% divided among the aforementioned three categories. Different racial compositions of a population may require that certain needs be met, as in the case of language proficiency courses for those who do not speak English.

The age composition of the national population and the SRECI regional population indicates that birth rates are declining and World War II baby boom children have graduated. Louisiana was the only State in the SRCEI region with more children at the 4 and under age group than the 5-9 year old group.

Figure 11 indicates the age distribution of the population. Age figures are important from the perspective of financing education and planning educational needs and facilities. The 1980 figures for Louisiana show the State with a population aged 0-19 larger than that of the average SRCEI population. The region also has a smaller than regional average population aged 65 and over. This could indicate future problems of financing education, if there are not enough people to finance the present generation's education.

IV. PERSPECTIVES AND FORECASTING

A. Perspectives on Louisiana Education

A number of interesting developments occurred in education in Louisiana during the past decade. The educational attainment of the state's citizens at the beginning of the 1970s was low: 13.1% of the adult population had fewer than five years of schooling, while only 42.3% of the adult population had completed high school and 9.1% had completed college.[16] By 1976 the U.S. Bureau of the Census indicated that only 8.7% of the adult population lacked a fifth grade education, while 58.3% had completed high school and 11.5% had completed college (see Table 33). Since this trend toward higher educational attainment by the state's adult population can be reasonably assumed to have continued through 1982, the past decade was characterized by a marked increase in the absolute educational attainment level of the state's citizens.

However, the state's rank in educational attainment relative to other states failed to improve from 1970-76. Louisiana had the highest percentage in the nation of its adult population with fewer than five years of education in both 1970 and 1976. In 1970 the State ranked forty-second in percent of its adult population with a high school education; the State dropped to forty-third in 1976. Similarly the State dropped from thirty-sixth to forty-first in percent of the adult population with a college education from 1970 to 1976.

Thus, educational attainment in Louisiana during the past decade was characterized by an improvement in the absolute number of years completed accompanied by a maintenance of rank relative to other states. Why didn't the State improve from 1970 to 1976 relative to other states? Two factors may have contributed to this failure to improve: (1) a very large percentage of the population had fewer than five years of education in 1940 (48.4%), 1950 (37.8%) and 1960 (27.9%) and many of these adults are still in the population in 1982; (2) since the State has an almost negligible migration rate (+0.6% from 1970 to 1979), there is little chance for an in-state migration of higher educated citizens or an out-of-State migration of lower educated ones.

As noted in Section I, another development in education in Louisiana in the past decade was the decrease in student enrollment. This decrease was produced primarily by a decline in elementary enrollment, while secondary enrollment stayed at about the same level during the period. This decrease in student enrollment was accompanied by a decrease in student-teacher ratios.

While the pupil-teacher ratio decreased steadily throughout the past decade, Louisiana's national rank changed very little over this period. As noted in Table 39, Louisiana had the thirty-third lowest ratio in 1970, compared to the twenty-eighth lowest in 1978 and thirtieth lowest in 1981. A PAR analysis[16] on declining enrollments published in 1978 concluded that, "Less can mean more--more competent and enthusiastic teachers, more learning in the classroom and more efficient use of funds and facilities--but only if there is proper planning, sound policies and a commitment to make these objectives a reality."

Recent analyses by Glass and Smith[18] of the studies examining the relationship between class size, student achievement, teacher morale and pupils' attitudes affirm the benefits of smaller classes. The following relationships were discovered by these authors: (1) as class size increases, achievement decreases; (2) in smaller classes, pupils have more interest in learning; and (3) in smaller classes, the morale of the teachers is better. Thus, the trend toward a smaller student-teacher ratio over the last decade may be regarded as a positive direction for Louisiana elementary and secondary education.

Approximately 590,000 public and nonpublic students have been transported to and from school annually during the past decade. In the 1981-82 school year the State of Louisiana operated 7,390 school buses at an annual cost of approximately $172.58 per student. These buses have traveled an average of 60 million miles each year. The cost for this transportation, on an annual basis, has risen steadily during the decade with the cost for the 1981-82 school year being approximately 106 million dollars. More information for school year 1981-82 can be obtained by examining Item 19 on the State Summary Profile.

The past decade was characterized by a large increase in the student population of special education. There was an increase of 71.9% (from 15,851 in 1971-72 to 27,246 in 1981-82) in the population in special education classes in public schools. This increase tells only part of the story, however, since that population includes only those students in self-contained classrooms. According to figures gathered for the minimum foundation program's equalization distribution,[18] there were 80,916 students enrolled in all types of special education classes at the end of the first reporting period in 1981-82. In addition to those students in self-contained classrooms, this figure includes 31,488 students enrolled only in speech therapy and 32,101 enrolled in resource special education classrooms. The total number of students in special education in 1980-81 was 78,016 according to the same source. See the State Profile for a breakdown of the special education students by type of class in 1981-82.

Total expenditures for special education in Louisiana increased exponentially during the past decade as can be seen in Table 50. State expenditures on special education for 1981-82 were 9.1 times higher than those for 1972-73, while 1981-82 Federal expenditures were 44 times higher than those for 1972-73.

The passing of Public Law 94-142 (Education for All Handicapped Children Act) by Congress in 1975 was, to a large degree, the impetus behind the expansion of special education in the State. The law calls for individualized schooling for all physically, mentally and emotionally handicapped students. Revised Statute 17:1941 et seq., beginning with Act 754 of the 1977 Regular Session of the Louisiana Legislature, encompasses Louisiana's State regulations in compliance with P. L. 94-142; the Act was implemented in the local school systems in September, 1978.

One immediate effect of this emphasis on special education was a dramatic increase in the number of evaluations carried out each year. According to a report on special education by PAR published in 1973,[20] there were 8,863 evaluations of children for special education purposes in school year 1972-73. It is estimated[21] that 30,915 initial evaluations and 20,205 re-evaluations occurred in 1981-82. Additionally, 12,520 students received pupil appraisal support services in this year.

The number of children in the gifted and talented category increased from 698 in 1975-76 to 8,154 in 1981-82 according to estimates from the Office of Special Educational Services. Other significant developments in special education in the past decade included: (1) the establishment of statewide standards for the evaluation of each child (contained in the Pupil Appraisal Handbook, Bulletin 1508) in October 1978; and (2) the introduction of a nondiscriminatory intellectual achievement testing program [the System of Multicultural Pluralistic Assessment (SOMPA)] for placement in special education.

Over $100 million was invested in the expansion of Louisiana's vocational-technical system to 52 schools during the past 10 years. Enrollment and expenditures for vocational education programs from 1972-73 through 1981-82 are found in Table 51. The majority of the secondary students counted in Table 51 are in city/parish school systems. Total enrollment in vocational education programs in 1981-82 equalled 243,064 students[22].

Vocational Education Amendments of 1976 (Public Law 94-482) mandated new vocational activities including a displaced homemakers' program, the establishment of a sex equity coordinator position and special vocational education programs for handicapped persons. The displaced homemakers' program now has seven centers in operation.[23] Vocational programs for students with limited English speaking skills were also initiated in Louisiana during the decade.

Vocational education has begun an effort to meet the priority needs of energy education. The lignite coal deposit in northwest Louisiana has become a focal point in increased job opportunities in this section of our State. In response to this energy source, the Office of Vocational Education has funded a Research and Training Project to provide flexibility in skills training to meet the needs of lignite coal related industry.

Adult education continued to play an important role in Louisiana education during the last three years; 11,211 students received the general equivalency diploma in 1980, 12,230 in 1981, and 11,842 in 1982.[24] Enrollment in Louisiana Adult Basic Education and Act 43 Adult Education programs has increased 36.2% since 1974-75, with 43,223 participants actually enrolled in 1981-82. See Table 52 for further summary information on enrollment, achievement, and termination of students in adult education from 1974-82.

B. Forecasting Louisiana Education in the 1980s.

It appears that several factors that influenced education in the 70s will continue to do so in the 80s.

- Student enrollment in elementary and secondary schools will stabilize in 1982-83. The Louisiana Board of Regents predicts that after the overall decrease in total enrollment during the late seventies and through school year 1981-82, a reverse trend will begin with modest increases occurring in 1983-84 through 1985-86. See Table 53 for enrollment projections by grade level through 1985-86.

- Enrollment in special education classes will continue to increase. According to P.L. 94-142 each child enrolled in special education must be provided an individual education plan, written in cooperation with school officials, teacher and parents. Further, renovation of some school facilities will be necessary because of the 94-142 legislation which requires that school sites be accessible and usable by the handicapped.

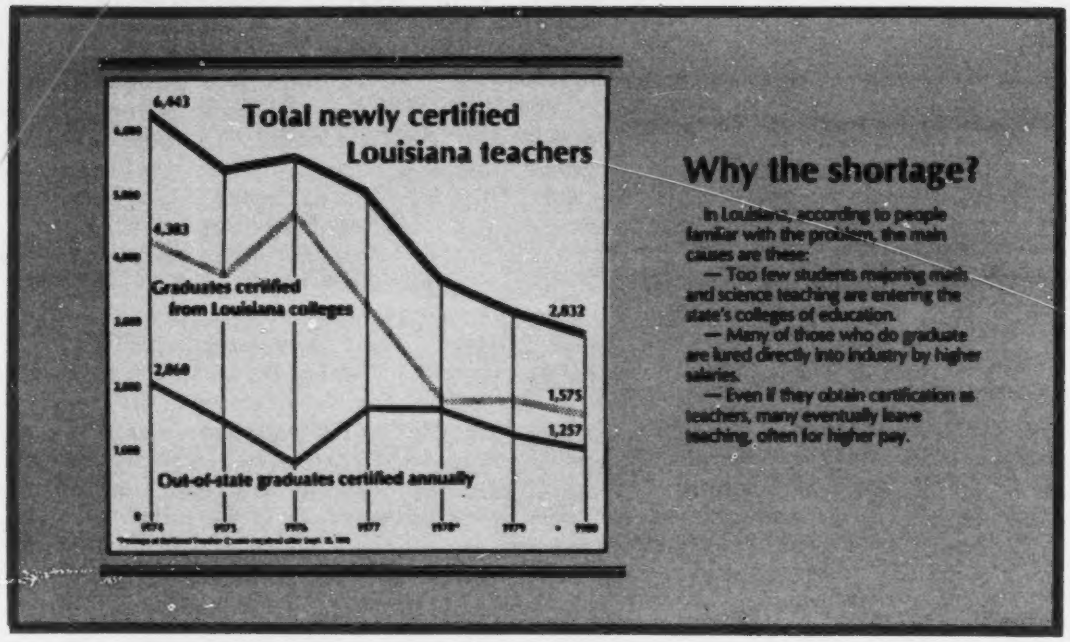
- Desegregation continues to be an important issue in the 1980s. Several districts continue to be involved in litigation.[25] According to a 1979 HEW civil rights survey, Louisiana ranked second behind Alabama in the list of states with the most segregated districts in the nation. This report[26] continues to be disputed by many Louisiana school officials and is a reflection of the importance of this issue. The Brumfield vs. Dodd case[27] will continue to have an impact upon school district funding since this decision made it unconstitutional for the State to give assistance to any racially discriminatory or segregated nonpublic school.

- Accountability and assessment will continue to be important in the 1980s. The 1979 Competency-Based Education Act 750 (R.S. 17:24.4) provided for the coordination of the previous student assessment and personnel evaluation activities begun under Act 621 of the 1977 Regular Session of the Louisiana Legislature. Revised Statute 17:24.4 requires an eventual merging of the Louisiana State Assessment Program and the Miniumum Competency Testing Program. (The MCT program is now being called the Basic Skills Testing Program in order to communicate more effectively with parents and citizens.) The total program will become the Louisiana Literacy Assessment Program. The fall testing program of reading, mathematics and writing in grades 4, 8, and 11 was converted to a spring testing program in grades 3, 7, and 10 in the 1980-81 school year. Revised Statute 17:24.4 requires the implementation of the Louisiana Literacy Assessment Program, and a component of this is the Basic Skills Testing Program. The program was implemented in the 1980-81 school year with the development and piloting of Grade 2 test items based on the basic skills minimum standards. In 1981-82 the test was administered and used as the principal criterion for a student's promotion to Grade 3. A student must score a minimum of 75% on both the language arts and math portions of the test. Each year thereafter an additional grade will be added for purposes of basic skills testing until 1992 when all students in grades 2-12 are being tested.

- Teacher salaries and teacher shortages will continue to be important issues. Teacher salaries, as compared to industrial salaries, continue to be significantly less. According to a February 14, 1982 story in the Baton Rouge Sunday Advocate, area industry pays a nonsupervisory employee in the range of $24,000 a year plus fringe benefits, including paid vacation, and employees in many plants are able to boost their income by means of overtime pay. By contrast, this same news story stated that an average Baton Rouge teacher with 10 years experience earns about $16,000 for nine months work, with no paid vacations. The issue of teacher shortage is clearly related to salary. Opportunities, particularly in the areas of industrial arts, math and science, exist in industry. See Figures 12 and 13 for more information on these two topics.

- Collective bargaining will be an important issue for Louisiana teachers in the 1980s. Unlike many other states, Louisiana has no collective bargaining statute for public employees. However, in recent years two bills have been introduced in this area. Several districts, including Jefferson, Orleans and East Baton Rouge had teacher strikes in the latter part of the 1970s and collective bargaining remains an issue before many local school boards.

Figure 12. Teacher Shortage



Why the shortage?

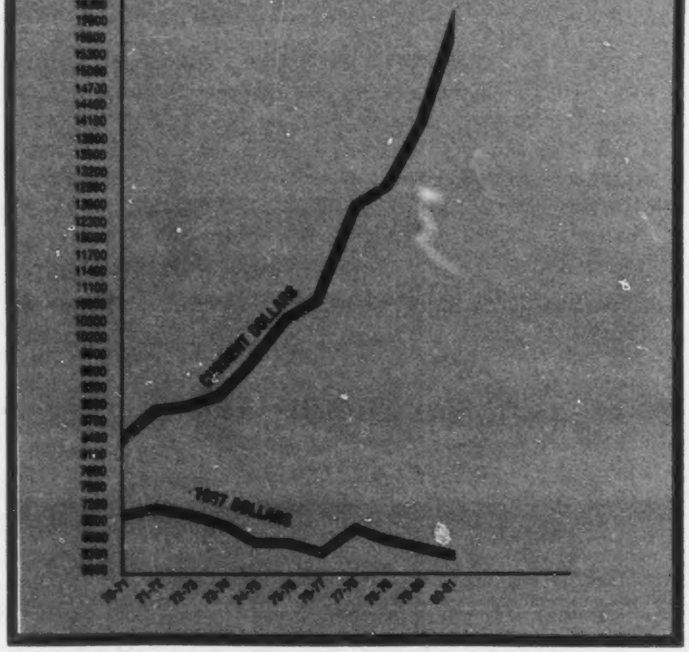
In Louisiana, according to people familiar with the problem, the main causes are these:

— Too few students majoring math and science teaching are entering the state's colleges of education.

— Many of those who do graduate are lured directly into industry by higher salaries.

— Even if they obtain certification as teachers, many eventually leave teaching, often for higher pay.

Figure 13. Average Annual Salaries of Teachers, 1970-1980



- Revised Statute 17:24.4 calls for compensatory programs for students who fail to meet the 75% mastery level on the Basic Skills Test as established by the Board of Elementary and Secondary Education. In 1982 8% of the second grade population failed to meet the mastery level in language arts and 5% failed in mathematics. Remediation for summer school of 1982 cost approximately $2.1 million. Funding for remediation is expected to remain a critical need for several years.

- Personnel evaluation is expected to accelerate during the 1980s. Although this responsibility belongs primarily to the local district, the state's monitoring role is likely to increase. To further strengthen the quality of teachers and administrators entering the teaching profession in Louisiana, R. S. 17:6 (Act 16 of the 1977 Special Legislative Session) made passing the NTE a requirement for receiving initial State teaching certification. The Professional Improvement Plan (PIPS) was created by R.S. 17:3601-3661 (Act 207 of the 1980 Regular Legislative Session) with the purpose of improving teacher competencies. The legislation allows teachers and other school administrators to create five-year professional improvement plans for themselves, and upon successful completion of these programs to receive substantial salary increases.

- Funding Sources expected to decline during the first half of the 1980s. Essentially, the new Block Grant Concept will have three "Chapters." Chapter one is the old Title I program. Chapter Two consolidates 33 other title programs. Chapter Three contains regulations and funding information. While the total impact of the Block Grants cannot be assessed as of this writing, special education may experience as much as a 25% reduction, vocational education a 12½% decline and Title One an additional 7% cut. What can be stated with certainty is that Louisiana will lose hundreds of millions of dollars in Federal aid to education.[28]

Two recent publications, Louisiana: Priorities for the Future (sponsored by Governor Edwards, the Louisiana Legislature, and the Council for a Better Louisiana) and Focus on the '80s - 20/20 Solutions (published by the Public Affairs Research Council),[29] listed recommendations to improve education in Louisiana during the next decade. The priorities for education recommended in Louisiana: Priorities for the Future are as follows:

1. Establish minimum proficiency requirements for students at all levels of education.
2. Review and upgrade certification standards for teachers, supervisors and administrative personnel with special emphasis on requiring proficiency in English and other basic skills.
3. Support classroom teachers with programs and policies to raise their effectiveness.

4. Establish a clearly defined, ongoing evaluation system for teachers, supervisors, and administrators at the elementary, secondary, and college levels--particularly for granting tenure.
5. Develop effective and appropriate approaches to deal with discipline problems.
6. Provide students with the best start possible in their academic careers.
7. Establish comprehensive guidance programs at all grade levels.
8. Develop and expand all programs for gifted and talented students.
9. Provide adequate funding of public education at all levels on a continuing basis to make quality education a reality.
10. Make a firm commitment to develop community support for public education.
11. Reorganize the structure and functioning of higher education.

Several of these priorities (1, 2, and 4) relate to teacher evaluation and student assessment. Highly recommended actions to accomplish priority three include providing adequate time for preparation and planning during school hours, extending employment to include a minimum of 10 extra days for teachers to use for planning and in-service training, and increasing teacher pay with built-in cost of living raises.

One recommended action to deal with discipline problems was to adopt a five-year "reduction in classroom size" schedule. In order to provide students with the best start possible in their academic careers, one recommendation was to initiate a mandatory kindergarten program statewide for all children aged five. One recommendation to make quality education a reality (priority nine) was to re-establish the dedication of the Severance Tax and other specific funds to education through a constitutional amendment.

In addition to these general educational priorities, the report suggested five priorities in reworking the curriculum of public schools. These priorities are: (1) emphasize the basic skills: reading, speaking, writing, listening and mathematical computation; (2) encourage innovative new curricula designed to provide Louisiana's students with the basic skills and knowledge necessary to function successfully in today's complex society; (3) establish an intensive college preparatory curriculum; (4) pursue active programs for continuing and adult education; and (5) improve and expand the state's vocational/technical education programs.

The Public Affairs Research Council publication made the following recommendations for education changes in the 1980s:

1. Revamp the State school aid formula.
2. Improve teacher competency.
3. Abolish tenure for school administrators.
4. Change terms of local school boards.
5. Improve administration of vo-tech schools.
6. Appoint the State superintendent of the education.

The broad spectrum concerns in these publications encompass both student-oriented and educator-oriented priorities.

It appears that no comprehensive legislative packages will be introduced in the next few years since most of the measures dealing with improved student performance and legislation affecting teachers have been enacted. Rather, the focus for educational improvements for the early years of the 1980s shall be to implement successfully the intent of previously passed legislation. School improvement is expected to occur in two areas: (1) increasing student performance and (2) upgrading opportunities for professional development of Louisiana educators. The 1980s promise to be an era of continued growth and improvement for the Louisiana educational system.

* 1979-80 was the first year that districts were asked to report the number of Hispanic, American Indian and Asian students who were registered in their schools. Some districts noted difficulty in reporting this information, so there is probably an undercount of students from these ethnic groups for this year.

* The dropout data reported here were collected by the Bureau of Student Services in the Louisiana State Department of Education. Enrollment data from which percentages were calculated were taken from Annual Reports of the Louisiana State Department of Education. The percentages were calculated by the Louisiana State Department of Education.

** Dropout data for 1980-81 were not available for Natchitoches Parish. Registration data from Natchitoches Parish were not included in calculation of the percent of total registration who drop out.

*** The sum of the percent of registration who are white plus the percent of registration who are black does not equal 100 percent in 1980-81, because some of the registered students were classified as other race, not white or black.

* Experience of principals and teachers was reported by the districts in 1979-80 in the following categories: 0 years, 1-2 years, 3-5 years, 6-9 years, 10-12 years, 13-14 years and 15 or more years. This categorization is different from that reported for the years 1972-78. In order to obtain comparable data across the decade, an extrapolation was performed on the 1979-80 data. Category 0-4 years experience for 1979-80 includes categories 0, 1-2 years and 2/3 of the number reported for category 3-5 years. Category 5-9 years experience for 1979-80 includes 1/3 of the number reported for category 3-5 years plus all those in category 6-9 years.

** This figure does not include 38 principals from Ouachita Parish for whom experience data were unavailable.

* These totals do not include students in kindergarten or special education. The total figures for the projections for grades 2-12 do not equal the combined projections for public and nonpublic schools. The reason for this is that each phase of the model--public, nonpublic, total--uses numbers relative to that phase only. The projections for 1982-86 were made by Mr. Larry Goux of the Louisiana Board of Regents. His projections exclude kindergarten and special education students.

School District Profiles

SCHOOL DISTRICT PROFILES

General Explanation

This is the fourth year of the Annual Report in which data gathered for each of the parish/city districts are in one place, rather than being spread throughout the report. This format aids readers interested in detailed information on a particular school district. A Louisiana state summary profile precedes the individual district profiles and includes aggregate data for the state. This state profile supplements the data found in the state summary tables.

Please note that the entry NA appears throughout the profiles. This entry means data were not available for that district on that piece of information.

Also, please note that percentages for several items (item 8, for example) are computer generated. Due to rounding, the sum of the percentages for some of these items may equal 99.9 or 100.1, rather than 100.0.

Footnotes are also found throughout the profiles. Instead of repeating each footnote for each profile, the footnote is included only once in this general explanation. Please read the following footnotes before turning to the state and district profiles:

A - Student registration is recorded at the beginning of the year and does not include gains or losses.

B, E - The Bureau of Research is grateful to Mr. Larry Goux of the Board of Regents' staff for supplying the projections for school registration for 1982-86. Please note that there are no projection figures for registration in the cities of Monroe and Bogalusa. The projected registration figures for Monroe and Bogalusa are included in the projected registration figures for Ouachita and Washington parishes.

C - The total public school registration figure in the state profile for 1981-82 includes thirteen students who were postgraduates.

D - The Bureau of Research depends on the voluntary reporting of nonpublic student registration by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic students.

E - See B above.

F - These totals include special education and postgraduate students. The postgraduate students are included in the 9-12 totals.

G - Natchitoches Parish did not report the number of students in the parish who dropped out for 1981-82 by grade level. The only data available from Natchitoches Parish were the total number of dropouts. Also, please note that the sum of the dropouts by grades does not equal the total number of dropouts for five districts (Ouachita, Sabine, St. Helena, Union, West Carroll). The Bureau of Research received these data from the Bureau of Student Services, which had collected and audited the data. This results in a discrepancy of 50 students between the sum of the dropouts by grades and the total number of dropouts on the state summary profile. The summary by grades equals to 15,078; the total number of dropouts equals 15,128. Due to inaccuracies in the data, the state summary profile does not break down the black and white dropouts into male and female categories.

H - Other professional/technical personnel include part-time classroom teachers, visiting teachers, curriculum specialists, guidance counselors, librarians, media specialists, physicians, nurses, dentists, dental hygienists, social workers, psychologists, student workers and others.

I - Support staff includes office/clerical workers, crafts/trade workers, laborers, and service workers.

J - % = percent of full-time staff for that row.

K - The Bureau of Research depends on the voluntary reporting of nonpublic school data by the nonpublic schools in the districts. In some cases, these nonpublic schools may not report data thus resulting in an undercount of nonpublic schools.

L - School year 1981-82 revenue figures do not include Federal Indirect Costs as in prior periods.

M - The amounts indicated in the bonded indebtedness section are taken directly from the Parish Financial Statements. These statements are not derived from audited figures. Debt service amounts may be indicated as bonded debt in some instances.

N - Total cost of school transportation data was obtained from the Louisiana Department of Education, Bureau of Transportation and includes data pertaining to Act 754, 1977 Regular Session.

O - In Item 20, the districts were ranked from the one with the largest value (1) to the one with the smallest value (66) on all categories except one: the ratio of public students to teachers where the ranks were reversed.

P - Current expenditures include only instruction and support services.

Q - Only full-time teachers are counted in computing this ratio.

R - This percentage is based on the number of public high school graduates from the previous year who went on to public four year institutions, private four year institutions, or junior colleges. Four districts, Madison, Richland, Tanigipahoa, and Tensas, reported this data aggregated for both public and private high school graduates. Also, Sabine reported only partial information on this item, so their data was not reported for this year.

S - Per capita figures were not available for the cities of Monroe and Bogalusa. See per capita figures for the parishes of Ouachita and Monroe. Also, note that the 1979 figures have been revised by the United States Department of Commerce and are different from the 1979 figures reported in the 1980-81 Annual Statistical Report.
